

Relative role shifts agree; absolute Userness depends on the probe

Marker span · (permission – neutral) – paired null-span effect · n = 100 template–page pairs

SUCAT · five-role probe

UAT · three-role probe

—●— Marker first - -○- - Marker second

Permission raises relative User/Tool in every tested setting; Userness falls at layer 12 with SUCAT.
Bars are pointwise 95% paired-bootstrap intervals; these readouts do not measure behavior.
